DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6, 13, and 42-63, are drawn to a pharmaceutical composition comprising phanquinone and a compound or a mixture of compounds, selected from the group comprising antioxidants, acetylcholine enhancers, trace metals, prosthetic groups and clioquinol provided, when clioquinol is selected, that at least one further compound is selected from the said group, classified in class 424, subclasses 451, 449, 464, and 600 for example.
- II. Claim 64, is drawn to a kit comprising in one or more containers an amount of phanquinone and clioquinol effective to treat or prevent Alzheimer's disease, and an amount of vitamin B₁₂ effective to inhibit a detrimental side effect of clioquinol administration, classified in class D42, subclasses 100-104 and 108 for example.

The inventions are independent or distinct, each from the other because:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have

Art Unit: 1617

different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the inventions of Group I can be in a kit that does not comprise cliquinol or a vitamin.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Species Election

This application contains claims directed to the following patentably distinct species:

- 1) antioxidants
- 2) acetylcholine enhancers
- 3) trace metals
- 4) prosthetic groups.

The species are independent or distinct because each species are made up of compounds with different structures that can be classified in various classes and subclasses.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1617

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

During a telephone conversation with Zhu Xiachun on March 13, 2007 a request for an oral election to the above restriction requirement was made, but a written restriction was requested.
